

ALUMINUM MANDREL PIG

The Aluminum Mandrel Pigs, like Steel Mandrel Pigs, give you limitless options with the addition of cups, discs, brushes, magnets, and gauge plates, making them one of the most versatile product lines we offer.

Aluminum Mandrel Pigs offer immediate weight savings in comparison to steel pigs. Depending on size, Aluminum Mandrel Pigs can have a 50% weight reduction in comparison to steel. This weight savings promotes safety and ease of use for those responsible for launching and receiving pigs, and it reduces stress on the urethane components. The Aluminum Mandrel pigs offer unmatched versatility and benefit and are a great option to incorporate into your pipeline integrity program.

➔ **AVAIL. FOR PIPE SIZES 8" - 30"**
