

# SUPER CAST PIG

The one piece Super Cast Pig offers a logical cost effective alternative to poly foam pigs. Available in diameters from 2"-12" Super Cast is the ideal product for a broad range of applications around refineries, chemical plants, oil and gas pipelines, and municipal utility lines. Its soft durometer allows it to last ten times longer than poly foam pigs. The Super Cast Pig is available as a cup pig or as a bi-directional disc pig. The Super Cast Cup Pig is available with a configuration of between 2 and 7 cups.

The Super Cast Pigs use the same long-lasting MDI polyurethane as all of Sun Pipeline Solutions urethane products. Super Cast Pigs are available in three durometers, depending on your requirements.

➔ **AVAIL. FOR PIPE SIZES 2" - 12"**

## FEATURES & BENEFITS

- Several durometer hardnesses
- 2 to 7 cup variations
- Magnet can be mounted
- Cost-effective alternative to poly-foam pigs
- Long-lasting MDI polyurethane
- Available as a cup pig or as a bi-directional disc pig
