

SUPER FLEX PIG

The Super Flex 3C Pig is a solid-cast MDI polyurethane pig designed is a great option for removing liquids from wet gas systems and liquid pipelines, it also can be used to control paraffin build up in crude oil lines, separation of refined products, pipeline commissioning and product evacuation.

The cup design allows easy transitions with full wall seal through bends, tees, check valves, and all other valves your job may be facing. With a hollow core, Transmitters can be easily mounted inside. Bolt-on wire brushes and magnets are available when more aggressive cleaning is required. "It's a one all be all type of Pig."

➔ **AVAIL. FOR PIPE SIZES 4" - 12" AND 16"**

FEATURES & BENEFITS

- Brush assemblies – Carbon Steel, Stainless Steel, Pro Stran
- Magnets
- Transmitter compatible
- Several durometer hardnesses
- Solid-cast MDI polyurethane
