

# TUFFCAST PIG

The Tuff Cast Pig product line combines a conical sealing cup with two scraping discs providing both actions in one pig. This solid cast construction makes for a lightweight and economical general-purpose cleaning pig and is made from the same durable MDI urethane as all our other product lines. The sealing surface of the cup and high abrasion resistance of MDI urethane allows the Tuff Cast to be run over long distances without the fear of pig failure due to wear and tear. When heavy cleaning is needed the Tuff Cast Pig allows the mounting of carbon steel or stainless-steel brushes along with magnet wraps.

Tuff Cast Pigs are also designed with hollow core bodies to allow for the mounting of magnets or pig tracking devices. They can be manufactured from several different durometer harnesses so they can meet the needs of unique situations. Super Capable, Super Tuff.

➔ **AVAIL. FOR PIPE SIZES 4" - 24"**

## APPLICATIONS

- Batching dissimilar products
- Paraffin removal from crude-oil lines
- Removing liquids from gas systems
- Heavy cleaning

## FEATURES & BENEFITS

- 2 conical cups and 2 scraper discs
- Brush/Magnet wraps or combination of both
- Transmitter/Magnet compatible
- Several durometer hardnesses
- Pure MDI urethane
- Hollow core bodies
- Lightweight and economical
